The AN/M3 was a derivative of the Swiss Hispano-Suiza HS404 cannon, which was introduced in the late 1930s. These guns were not widely used on US aircraft until after World War II when the improved AN/M3 version was developed. This version was then used to arm many fighters and bombers during the 1950s.

Development. The M39 was developed by the Springfield Armory, based on the World War II-era design of the German Mauser MG 213, a 20 mm (and 30 mm) cannon developed for the Luftwaffe, which did not see combat use. The same design inspired the 30mm British ADEN cannon and the French DEFA, but American designers chose a smaller 20 mm round to increase the weapon's rate of fire and muzzle ...
