Act On Fire Bca Compliance

Clause E2.2(b) of the BCA requires that each sole-occupancy unit in a class 2 or 3 building be treated as a separate fire compartment. A question that often arises is whether mechanical penetrations through fire-rated bounding walls of residential apartments require fire or smoke dampers. Note. A smoke damper is by definition also a fire

Performance Solutions

In the majority of cases, building regulation such as the Building Code of Australia (BCA) requires the installation of essential fire safety measures. Council may request other items of equipment or methods of construction, not part of a typical list of essential fire safety measures, to ensure the safety of persons in a building in the event of fire, or the prevention of fire or to prevent the spread of fire.

Fire safety - Inner West Council

Recent changes to the Swimming Pools Regulation 2018 help clarify the ways in which pool barriers can comply with the Building Code of Australia (BCA).

Previously, the standard for swimming pool barriers was the relevant Australian Standard (or 'deemed-to-satisfy' solution) referenced in the BCA.
