Aircraft Engineer LogBook

The aircraft technical log is the primary source for technical and operational data on each flight that occurs on an aircraft. This data includes defects and malfunctions, block times and fuel consumption. It also records all maintenance carried out on an aircraft between scheduled base maintenance visits.

and pollution. In fact, aeronautical engineering has an increasing focus on the environmental impact of aircraft. Engineers may need to use aircraft computer-aided-design (CAD) software such as DOORs and NASTRAN, so there is often a call for software specialists and IT skills.

Aircraft Engineering: Job Description

After every flight, pilots complete a gripe sheet which conveys to the mechanics problems encountered with the aircraft during the flight that need repair or correction. The form is a piece of paper that the pilot completes and then the mechanics read and correct the problem.

Funny Maintenance Responses

Aircraft maintenance engineers spend most of their time working on various types of aircraft systems. This job includes scheduling and performing routine maintenance and inspection
