AISC will perform an Eligibility Review for all programs and endorsements the applicant has applied. AISC will move the applicant onto the documentation audit, in which the Audit Agency will perform an in-depth Documentation Audit of the Application Documentation Submittals. The applicant must resolve any deficiencies.

Resources | American Institute of Steel Construction

AISC's Certification program has evolved quite a bit since its inception in the mid-1970s, when it was a checklist system that auditors used for evaluation and to document a company's commitment to quality. In 2003, checklist-based programs started being replaced with standards-based programs, requiring companies to have written pro-

Be sure to read the requirements on the On-site Audit Checklist as it contains more detailed information on what the auditor will be looking for. The onsite audit will consist of an opening meeting, a review of your facility's quality manual, an inspection and audit of the facility itself, and a closing meeting to discuss any findings and concerns observed by the auditor.

A common tool used during audit planning is the pre-audit checklist, or questionnaire. The checklist can have many uses, including gathering preliminary information to scope the audit, determining the key business risks, identifying areas for more audit attention and informing the client of data needs.
