Building Scalable Web Sites - O'Reilly Media

Building a small site, hosted on a single server, would be pointless. Scalable web architecture must be built in so that as more users upload and retrieve data of any kind, there is the capacity to store it and to allow fast retrieval. Dividing the Functions: Service-Oriented Architecture (SOA) is the solution. Each service (write and read) can ...

How to Build a Scalable Web Application? - Romexsoft

Some of our services only get a few hits per day while others get thousands of requests per second. In many cases we don't know which sites will need to scale when and by how much. In the case of a typical website (LAMP or similar), there are a few best practices that, if adopted up front, save time and energy when a site becomes popular.

How to make a scalable web application ... - JustCoded

We recommend creating the web application and the web API as separate App Service apps. This design lets you run them in separate App Service plans so they can be scaled independently. If you don't need that level of scalability initially, you can deploy the apps into the same plan and move them into separate plans later if necessary.
