One of the purposes of the air handling unit is to ensure the purity of the room air. Air filtering is related to the quantity, variety and size of the suspended impurities, the existence of contaminant gases or odours, and the desired filtering efficiency. The various impurities that can exist in the air are discussed below.

Air Handling Unit

Take the guesswork out of getting commercial HVAC preventative maintenance. If you're like many business owners and managers, you feel like a fish out of water when you're faced with choosing a commercial HVAC preventative maintenance contract.When you're not an expert on the subject, evaluating the merits of one contract or vendor versus another can be difficult and confusing.

The Ultimate Commercial HVAC Preventative Maintenance ...

This term is used widely by manufacturers, distributors or consumers alike when dealing with HVAC units, especially air conditioners. As evident from the abbreviation, the S in SEER makes the measure seasonal; only in terms of cooling.

Ruud Air Conditioners Reviewed: AC Buying Guide & Comparisons

An air handler, or air handling unit (often abbreviated to AHU), is a device used to regulate and circulate air as part of a heating, ventilating, and air-conditioning (HVAC) system. An air handler is usually a large metal box containing a blower, heating or cooling elements, filter racks or chambers, sound attenuators, and dampers.
