Virus Disease Guide in Grapes - How do you treat grape ...

Pierce's disease (PD) of grape is caused by the bacterium Xylella fastidiosa (Xf) (Wilcox et al., 2015). Xf is a xylem-limited bacterium. "Xylem-limited" means that Xf only inhabits the xylem elements within the host plant. Xylem elements are the tissues that transport water and nutrients from the roots up to the shoots and leaves.
