In a 2005 issue of CIM we described a “tech mining” approach to generate competitive technical intelligence (CTI) (Porter, 2005). Tech mining addresses managerial issues by deriving empirical knowledge, primarily from patent and research publication abstract databases. This article extends the resource base to be mined to the internet.

for Competitive Technical Intelligence

Competitive Intelligence (CI) is the collection and analysis of information to anticipate competitive activity, see past market disruptions and interpret events. It's a key component of any business strategy. Competitive intelligence provides insight into marketplace dynamics and challenges using both published and non-published sources.
