Conveyor Chain; Conveyor Chain The precision conveyor chain, like transmission chain, consists of a series of journal bearings held in precise relationship to each other by constraining link plates. Each bearing consists of a bearing pin and bush on which the chain roller revolves.

Conveyor Chain Products - Renold Plc

Bucket Elevator Chain. Renold has been used successfully in elevator applications for many years and it has been found by experience that for most applications, chains that have been derived from the standard range of products are more than adequate. The inclusion of fillet welded K attachments to provide extra attachment strength and smaller than standard gearing rollers to reduce weight, are all that is required to produce a hard wearing and long lasting chain.
