Food additives are substances added intentionally to foodstuffs to perform certain technological functions, for example to colour, to sweeten or to help preserve foods. Under EU legislation from 2008, the safety of all food additives authorised for use in the EU prior to 20 January 2009 must be re-evaluated. The deadline for completion of the re-evaluation of all food additives is 2020, however, given the large volume of work the programme is likely to continue beyond then.
