Earth - Encyclopedia Britannica

Planet Earth is a science fiction television movie that was created by Gene Roddenberry, written by Roddenberry and Juanita Bartlett (from a story by Roddenberry). It first aired on April 23, 1974 on the ABC network, and stars John Saxon as Dylan Hunt. It was presented as a pilot for what was hoped to be a new weekly television series. The pilot focused on gender relations from an early 1970s ...

Planet Earth (film) - Wikipedia

Earth is the third of nine planets in our solar system. Its surface is mostly water (about 70%), and it has a moderately dense nitrogen and oxygen atmosphere that supports life. Rich in iron and nickel, Earth is a dense, molten oblate sphere with a solid core and a thin outer crust.

Encyclopedia of Planet Earth by Anna Claybourne Gill ...

A planet is an astronomical body orbiting a star or stellar remnant that is massive enough to be rounded by its own gravity, is not massive enough to cause thermonuclear fusion, and has cleared its neighbouring region of planetesimals.. The term planet is ancient, with ties to history, astrology, science, mythology, and religion. Apart from Earth itself, five planets in the Solar System are ...

Planet - Wikipedia

With an equatorial radius of 6,378 km (3,963 miles), Earth is the largest of the four inner, terrestrial (rocky) planets, but it is considerably smaller than the gas giants of the outer solar system. Earth has a single natural satellite, the Moon, which orbits the planet at a mean distance of about 384,400 km (238,900 miles).
