Kefir is happiest in fresh milk at room temperature. Try to pace your culturing with your consumption so that you can keep your kefir out of the fridge most of the time. If you only use a little bit of kefir, then just culture 2 cups at a time with 1 tbsp of grains. Alternatively, you can store your kefir in the fridge with lots of milk for 1-3 ...

The first fermentation happens when milk kefir grains are added to milk and cultured between 12-24 hours depending on if milk is kept in the fridge or on the room temperature. Once the grains are removed we are left with milk kefir. Milk kefir can be further cultured and flavored depending on the preference.
