Historically, biodiversity tends to be a sustainable business trend that comes and goes but now, it may (fortunately) be here to stay. In January, the environment was top of mind among the world's most notable business leaders at the World Economic Forum (WEF) in Davos.

Biodiversity and business: 4 things you need to know for ...

Preserving global biodiversity is a priority in strategic conservation plans that are designed to engage public policy and concerns affecting local, regional and global scales of communities, ecosystems and cultures.

Biodiversity - Wikipedia

From 22 to 25 May, the Conservation Forum of the European Association of Zoos and Aquaria was a venue for discussing conservation research, education and interventions, from the scale of villages to global policy. Keywords: biodiversity conservation, zoos, stakeholder engagement, evaluating conservation effectiveness, policy

Challenges in global biodiversity conservation and ...

Biodiversity, a contraction of biological diversity, is a recently invented term whose origins are readily traceable. The invention of the term "biodiversity" coincides with the emergence, in the 1980s, of two new scientific fields, genetic engineering and conservation biology.

Biodiversity - an overview | ScienceDirect Topics

In addition, the journal provides a forum for examining conflicts between conservation, sustainable development, and human dependence on biodiversity in agriculture, environmental management, and biotechnology, and encourages contributions from developing countries to promote broad global perspectives on matters of biodiversity and conservation.

Biodiversity and Conservation | Aims and scope

Global Biodiversity Crisis In the mid-1980s, the planet's "biodiversity crisis" burst forth as a critical conservation issue at the National Forum on Biodiversity, organized in Washington, D.C., by the National Research Council and spearheaded by Harvard University biologist Edward O. Wilson.
