### Good Calories, Bad Calories: Fats, Carbs, and the ...

Overview: For decades we have been taught that fat is bad for us, carbohydrates better, and that the key to a healthy weight is eating less and exercising more. Yet despite this advice, we have seen unprecedented epidemics of obesity and diabetes. Taubes argues that the problem lies in refined carbohydrates, like white flour, easily digested starches, and sugars, and that the key to good health is the kind of calories we take in, not the number.

### Good Calories, Bad Calories: Fats, Carbs, and the ...

There are good calories, and bad ones. ... With precise references to the most significant existing clinical studies, he convinces us that there is no compelling scientific evidence demonstrating that saturated fat and cholesterol cause heart disease, that salt causes high blood pressure, and that fiber is a necessary part of a healthy diet.

Good Calories, Bad Calories: Fats, Carbs, and the Controversial Science of Diet and Health is a 2007 book by science journalist Gary Taubes. Taubes argues that the last few decades of dietary advice promoting low-fat diets has been consistently incorrect. Taubes contends that carbohydrates, specifically refined carbohydrates like white flour, sugar, and starches, contribute to obesity, diabetes, heart disease, and other ailments. Taubes posits a causal

Good, low-fat sources of protein include lean meat, fish, poultry without skin, beans, lentils, tofu, fat-free or low-fat yogurt, milk, and cottage cheese.) Fat has more than twice as many calories per gram as carbohydrates and proteins. A gram of fat has about 9 calories, while a gram of carbohydrate or protein has about 4 calories.

### Fat and Calories: The Difference & Recommended Intake

Good Calories, Bad Calories (2007) [released as The Diet Delusion in the U.K.] In Good Calories, Bad Calories, Taubes tries to bury the idea that a low-fat diet promotes weight loss and better health. Obesity is caused, he argues, not by the quantity of calories you eat but by the quality. Carbohydrates, particularly refined ones like white bread and pasta, raise insulin levels, promoting the storage of fat.

### Good Calories, Bad Calories (2007) - Gary Taubes

So the 227 calories in an avocado will mostly be burned as your body extracts the nutrients, while 227 calories of a cookie, piece of cake or doughnut are more likely to be stored as fat. This is why it's not only important to be aware of how many calories you're taking in each day, but how nutritionally dense each calorie is.
