IP Subnetting Made Easy by John Kowalski | NOOK Book ...

Now with the substitutions and subtract 1 from the IP addresses you get a wildcard mask of 0.63.255.255, you're getting it, one more to go. Example 4: 248.0.0.0 with 8 IP addresses. Again with the substitutions and subtract 1 from the IP addresses you get a wildcard mask of 7.255.255.255, now you got it, wildcard masking made easy.

Subnetting and Wildcard masks made easy... - Cisco Community

An IP address is a numeric value that you configure on every device in a network, think about computers, laptops, servers but also networking equipment like routers, firewalls and switches. The IP address identifies every device with a "unique" number. Devices within the same IP subnet are able to communicate without using a router.

How to Master Subnetting - GNS3vault
