NERVOUS SYSTEM STUDY GUIDE FOR MIDTERM 4/23/ PART 1 - NERVOUS SYSTEM GENERAL > Describe the functions of the nervous system – how information flows in this system The nervous system is hardwired. It is in charge of things that have to happen rapidly.

Nervous System Study Guide - General Human Anatomy - SRJC ...

Nervous System An online study guide to learn about the structure and function of the nervous system using interactive animations and diagrams.

Nervous System • Structure & Function

The Autonomic Nervous System The peripheral nervous system consists of the somatic nervous system (SNS) and the autonomic nervous system (ANS). The SNS consists of motor neurons that stimulate skeletal muscles. In contrast, the ANS consists of motor neurons that control smooth muscles, cardiac muscles, and glands.

The Autonomic Nervous System - CliffsNotes Study Guides

The Nervous System. Functions of the Nervous System. 1. Gathers information from both inside and outside the body - Sensory Function 2. Transmits information to the processing areas of the brain and spine 3. Processes the information in the brain and spine – Integration Function 4. Sends information to the muscles, glands, and organs so they can respond appropriately – Motor Function.

The Nervous System

Three cavities, called the primary brain vesicles, form during the early embryonic development of the brain. These are the forebrain (prosencephalon), the midbrain (mesencephalon), and the hindbrain (rhombencephalon). During subsequent development, the three primary brain vesicles develop into five secondary brain vesicles.
