An organizational assessment (OA) can be defined as a systematic process for obtaining valid information about the performance of an organization and the factors that affect performance. It is conducted in order to demonstrate areas of competence, areas for improvement, and possible risks, help support investment and restructuring decisions.

## **Your Introductory Guide to OA | Reflect & Learn**

Diverse perspectives can affect the ways in which individuals react to self-assessments. As a preliminary step it might be useful to discuss how diverse perspectives may impact the process, so that goals of inclusiveness are taken into consideration both when designing the assessment and interpreting the results.

## **Organizational Self-Assessments | National Council of ...**

An organisational assessment is a systematic process for obtaining valid information about the performance of an organisation and the factors that affect performance. It differs from other types of evaluations because the assessment focuses on the organisation as the primary unit of analysis.

## **Evaluating the Performance of an Organisation | Better ...**

Organizational theory is based on its three perspectives, which are the modern, symbolic-interpretive and the post-modern. The perspectives each have different approaches when it comes to the management of an organization.

Like credit risk, supply chains have experienced intense disruption. This week, the McKinsey Global Institute looked at the effects not only of COVID-19 but of all manner of disruptions, including natural disasters, geopolitical uncertainty, climate risk, cyberattacks, and more. A key finding: over the course of a decade, companies can expect disruptions to erase half a year's worth of profits.
