MacPeds PEDIATRIC HANDBOOK

This book is designed to be a practical and convenient guide to the dosing and usage of medications in children. Pediatric doses vary with the age, weight, surface area and disease, etc. Overdosing may lead to side effects and under-dosing will lead to unsatisfactory response or development of resistance in cases of antibiotics.

Pediatric Drug Doses 2nd Edition PDF

Calculating Dosage Using Body Weight Method After converting the child's weight into kilograms, a safe dose range for that child is calculated. For example, if a dosage range of 10 to 30mg/kg of body weight is a safe dosage range and the child weighs 20 kg, calculate the low safe dose using the following: = Cross multiply the fractions: 10mg x 20kg = 1kg x Xmg.
