YMCA 3-minute Step Test - Topend Sports

The Chester Step Test is an effective way to assess a person's fitness levels by determining the rate of recovery following intense exercise. The test itself is called a sub-maximal test which requires the candidate to step up onto a step which is 30 cm (12 inches) in height. Once on the step with both feet the candidate will then step back off the step before repeating the movements in time with a metronome which is supplied as part of the Chester Step test package.
