A locomotive or engine is a rail transport vehicle that provides the motive power for a train. If a locomotive is capable of carrying a payload, it is usually rather referred to as a multiple unit, motor coach, railcar or power car; the use of these self-propelled vehicles is increasingly common for passenger

Online Library Railroad Engines From Around The World Coloring Book Dover History Coloring Book

The first engines in Vermont were fueled with wood. Wood was the dominant fuel during the first 40 years of the railroad, and many lines of the Central Vermont Railway ran on wood into 1892. A car behind the engine carried the wood that was burned to fuel the train. Every 30 miles, trains needed to stop at wood sheds along the tracks to "wood up."
