Behaviorism: A Critical Look - personality research

Studies on classical conditioning resulted to the emergence of other theories that may explain behavior and learning, and one of these is Operant Conditioning. Operant conditioning tries to negate the belief that internal thoughts and mere motivations would bring about learning a behavior. As a behaviorist, Skinner thought that only external causes of behavior should be considered.

Operant Conditioning - To Reward or To Punish?

Operant Conditioning If one follows the assumptions of a behaviorist, then not all behavior is genetically determined. Since it is not, it is either a function of responded or operant conditioning. Skinner surely followed the footsteps of
