multimedia icon. Multimedia. Abstract. As I noted 10 years ago in my review of the first edition of Textbook of Biochemistry, With Clinical Correlations, this is a big book. The third edition contains more than 1000 pages, contributions from 27 authors, and chapters on subjects as diverse as "Recombinant DNA and Biotechnology" and "Gas Transport and pH Regulation" (in addition, of course, to material on proteins, carbohydrates, lipids, amino acids, and nucleic acids/molecular biology).
