The shade of blue and green are determined by a variety of factors. The single greatest water color determiner is the background dye in the finish. For blue water look for a finish that is white, blue, black, or gray. For green water look for a finish that is green, brown, or tan.

Finish Your Swimming Pool | Water Color & Finish Options

Color in drinking water can be caused by dissolved and suspended materials, and a brown shade in water often comes from rust in the water pipes. Although water can contain contaminants, which are usually removed by water-supply systems, the plus side is that the water you drink likely contains a number of dissolved minerals that are beneficial ...
