A key consequence of agricultural intensification is landscape simplification, where

once heterogeneous landscapes contain increasingly fewer crop and non-crop habitats.

Landscape simplification exacerbates biodiversity losses which leads to reductions in ecosystem services on which agriculture

A natural landscape is the original landscape that exists before it is acted upon by human culture. The natural landscape and the cultural landscape are separate parts of the landscape. However, in the twenty-first century landscapes that are totally untouched by human activity no longer exist, [citation needed] so that reference is sometimes now made to degrees
