Visual Flight Rules International Virtual

Visual Flight Rules (VFR) are a set of regulations under which a pilot operates an aircraft in weather conditions generally clear enough to allow the pilot to see where the aircraft is going. Using the VFR flight rules, the pilot must be able to operate the aircraft with visual reference to the ground, and by visually avoiding obstructions and other aircraft.

regulations under which a pilot operates under conditions in which flying by outside visual reference is not safe, or flying by reference to instruments in the flight deck and navigation is accomplished by reference to electronic signals.

IFR flight rules - ICAO - International Virtual Aviation ...

Visual flight rules (VFR) are a set of regulations under which a pilot operates an aircraft in weather conditions generally clear enough to allow the pilot to see where the aircraft is going. Specifically, the weather must be better than basic VFR weather minima, i.e. in visual meteorological conditions (VMC), as specified in the rules of the relevant aviation authority.

Visual flight rules - Wikipedia

When flying under visual flight rules, there is no specific regulation about going-around. Contrary to flights performed under instrument flight rules,
